ACADEMIC PROJECTS

Inventory Management System

Tech Stack: React.js, Node.js, MongoDB

- Developed a web-based application to help small businesses track stock levels in real-time.
- Features include automatic low-stock alerts, sales reporting charts, and a user-friendly dashboard for adding and removing products.

Task Scheduler App (Minor Project)

Tech Stack: Python (Django)

- A productivity tool designed for students to organize assignments and exam dates.
- Includes a calendar view and email notification reminders for upcoming deadlines.
